260403-000237	02-Apr-2026 PST	Synapse 4 Razer Joro - unable to reset Bluetooth profile

-- Select Action --

CONVERSATION HISTORY

Customer (Mike Klodnicki) via My Support	16-Apr-2026 07:14 PM
'how to reset BLE pairs' is such a simple question with such a simple answer. it literally took two weeks to be answered correctly.	
Customer (Mike Klodnicki) via My Support	16-Apr-2026 07:11 PM
truly incredible that its taken razer support over two weeks to tell me how to reset BLE pairs. this should be in the user manual, but its not: long-press f1,2,3 buttons to reset BLE connection on each respective slot. ble buttons have three states: new ble connection (slow blink); reconnect to paired device (fast blink) and inactive (no light). shame on you for making me figure this out myself. you all have been worse than useless, misleading the end user multiple times and not knowing how your own damn product works let alone providing proper support for them.	
Razer Support (Harris) via My Support	16-Apr-2026 01:21 AM
Hi Mike, Thank you for the detailed information you’ve shared regarding the keyboard’s behavior. We’ve reassessed the case internally, and since the device is still able to attempt connections with your previous machines, this indicates that the Bluetooth functionality itself is working as intended. The reason we requested a video is to verify whether the pairing process is being conducted correctly, or if there’s a step we can point out to help resolve the issue. Please try the following procedure: Hold down F1 for 5 seconds until the indicator blinks white. On your new device, check the Bluetooth list for “Joro”. Select “Joro” to initiate pairing. If “Joro” does not appear in the Bluetooth list, this suggests the issue lies with the PC rather than the keyboard. To confirm, we recommend attempting the pairing process with another known working device.	

Once you’ve captured the video of the pairing attempt, kindly share it with us so we can review the steps and provide more precise guidance.

We appreciate your patience and cooperation as we work to resolve this.

To update this case, you can reply to this email or use our [Razer Support Portal](#).

Sincerely,
Harris

did not work.

Rule Response

14-Apr-2026 11:03 PM

Hi Mike,

Just checking in—we haven’t heard back from you regarding your support case, and want to make sure everything is going smoothly.

If you still need help, just reply to our last message and we’ll jump back in. Otherwise, if everything’s sorted, no worries—we’ll close this support case after 24 hours if we don’t hear from you.

Thank you for choosing Razer—we’re here if you need us!

12-Apr-2026 10:54 PM

Hi Mike,

Thank you for your patience.

We sincerely apologize for the delay you’ve experienced and understand how frustrating this has been.

Regarding the Bluetooth profile reset, please try the following steps:

- Hold down the FN + F1 keys together for 5 seconds.
- This will reinitiate the pairing mode.
- Once pairing mode is active, attempt to connect the device again to your new PC.

We recognize the inconvenience caused by the extended wait and want to assure you that your concerns are being taken seriously. Our team is committed to ensuring you can enjoy your keyboard without further issues.

If the steps above do not resolve the problem, please let us know immediately so we can escalate this further and explore alternative solutions. Your satisfaction is very important to us, and we will continue to support you until this matter is fully resolved.

Thank you again for your patience and understanding.

To update this case, you can reply to this email or use our [Razer Support Portal](#).

Sincerely,
Lydia

11-Apr-2026 12:46 AM

Hi Mike,

Thank you for sharing the details with us again. I completely understand how inconvenient this situation has been for you.

We’ve escalated your feedback to our internal team and are awaiting their guidance on the Bluetooth pairing concern you described. As soon as we receive any updates, we’ll reach out to you right away.

We truly appreciate your patience and understanding while we work toward a resolution.

To update this case, you can reply to this email or use our [Razer Support Portal](#).

Sincerely,
Lydia

no update? there's no way to reset keyboard to forget all paired devices?

Razer Support (Harris) via My Support

07-Apr-2026 10:10 PM

Hi Mike,

Thank you for clarifying the situation. I understand your concerns and the frustration this issue has caused.

We will check with our internal team regarding the Bluetooth connectivity problem you described, and we'll get back to you promptly once we receive an update from them.

We appreciate your patience and will keep you informed as soon as we have more information.

To update this case, you can reply to this email or use our [Razer Support Portal](#).

Sincerely,
Harris

Customer (Mike Klodnicki) via My Support

06-Apr-2026 05:35 PM

no update? you make a wireless keyboard that can be paired exactly three times and then it becomes useless?

Customer (Mike Klodnicki) via My Support

06-Apr-2026 01:31 AM

this is unrelated to the separate case you referred to. you want a video of me being unable to connect to bluetooth? of a BLE scan list that doesnt show the joro on it/ that makes zero sense. I have described the issue in depth. a video would serve no purpose.

Razer Support (Lydia) via My Support

05-Apr-2026 08:02 PM

Hi Mike,

Thank you for your patience.

I understand how frustrating it must be, and I'll do my best to work with you towards a resolution.

After further checking, we found out that you have reached out to us under case no: [260205-002544](#), regarding Razer Joro, where, when pressing F1 once, it switches Bluetooth profile, and the current team is still investigating it.

May I know if you are still experiencing the above issue?

Secondly, **may I get a Video demonstrating the incident?** If your file exceeds 25MB, you may upload it to Google Drive or any cloud sharing service you desire, and provide us with the link. Make sure the link access is set to public/everyone.

Hope to hear from you soon.

To update this case, you can reply to this email or use our [Razer Support Portal](#).

Sincerely,
Lydia

Razer Support (Sheena) via My Support	04-Apr-2026 01:28 AM
Hi Mike, Thank you for your continued cooperation. To further investigate the issue you are experiencing, we would like to request your Razer Synapse logs. These logs will help us analyze the behavior of the software and identify any underlying issues. We will be sending you a separate email with step-by-step instructions on how to collect and submit the Synapse logs. Please follow the instructions carefully and share the files with us once completed. Once we receive the logs, we will proceed with a detailed review and provide you with the next steps. We appreciate your patience and cooperation.. To update this case, you can reply to this email or use our Razer Support Portal. Sincerely, Sheena Razer Support Team mysupport.razer.com	
Customer (Mike Klodnicki) via My Support	03-Apr-2026 04:23 PM
FACTORY RESET in razer synapse just makes it forget synapse profile with respect to hotkeys, etc. after FACTORY RESET, keyboard immediately auto reconnects to old BLE device. and no new pairing possible.	

Customer (Mike Klodnicki) via My Support	03-Apr-2026 03:53 PM
current FW etc	
Customer (Mike Klodnicki) via My Support	03-Apr-2026 02:21 PM
Does the keyboard's indicator light blink in pairing mode when you hold down the Function (FN) key plus the corresponding Bluetooth number (e.g., FN + 1)? no. it blinks whenever you tap the F1, F2, F3 keys WITHOUT holding down the Fn key Have you manually "Forgotten" or "Removed" the keyboard from the Bluetooth settings on your old PC to prevent it from re-initiating the connection? yes If you switch the keyboard to a different Bluetooth profile (e.g., Profile 2 or 3), does it still attempt to connect to the old device? all profiles were connected at one point, so there are no empty profiles. everytime I tap one of the numbers, it attempts to connect to old machines, whether they still exist or not Does the reset behavior persist if you perform a hard reset using the physical key combination (usually holding Escape, Caps Lock, and Space Bar while plugging it in)? after doing this hard reset, BLE mode is unresponsive. entire keyboard is lit up, cycling through colors (demo mode). keypresses dont work until repeatign the procedure, upon which we are right back at the original situation, with all BLE profiles still full, device not truly reset. and yes, I've 'reset' the device several time thru synapse software, clicking the Joro device, then the question mark icon, then the FACTORY RESET button. same situation, all BLE profiles full, device not truly reset. firmware version 1.2.2.0 invoice attached. USA.	
Razer Support (Sheena) via My Support	03-Apr-2026 04:27 AM
Hi Mike, Thank you for contacting Razer. My name is Sheena and I'll be your support agent today. I understand that your keyboard is failing to clear its Bluetooth (BLE) profiles even after a factory reset in Synapse, causing it to auto-connect to your old PC and preventing new pairings. To help us isolate whether this is a firmware hang or an issue with the onboard profile management, please clarify the following: Does the keyboard's indicator light blink in pairing mode when you hold down the Function (FN) key plus the corresponding Bluetooth number (e.g., FN + 1)? Have you manually "Forgotten" or "Removed" the keyboard from the Bluetooth settings on your old PC to prevent it from re-initiating the connection?	

If you switch the keyboard to a different Bluetooth profile (e.g., Profile 2 or 3), does it still attempt to connect to the old device?

Does the reset behavior persist if you perform a hard reset using the physical key combination (usually holding Escape, Caps Lock, and Space Bar while plugging it in)?

Additionally, please provide the following for our documentation:

A PDF copy of your Amazon proof of purchase (Invoice): (The .txt file provided is not a valid proof of purchase).

Your Country of residence:

Once I have these details and your confirmation regarding the pairing mode behavior, I will review the next steps for your case.

To update this case, you can reply to this email or use our [Razer Support Portal](#).

Sincerely,
Sheena

[10:33:54 PM] Bot: Please select the symptom(s) your keyboard is experiencing by entering the associated numbers below separated by space (e.g. 1 2 3). (1) Not detected (2) Detected but not in Razer Synapse (3) Connection drops

randomly (4) Bluetooth not broadcasting (5) Dongle Pairing issue (6) Bluetooth pairing issue (7) Other symptom not listed (8) All of the above

[10:34:01 PM] Mike Klodnicki: 6

[10:34:01 PM] Bot: How is the device connected?

USB Cable

Bluetooth

USB Dongle

[10:34:06 PM] Bot:

Please try the following steps to resolve your issue:

Connect your keyboard directly to the PC and not a USB hub.

Test your keyboard with a different USB Port.

Get the latest **Windows update**.

Update the **firmware** of your keyboard if it is on the list.

[10:34:06 PM] Bot: Did these steps resolve your issue?

Yes

Tried all solutions but they didn't work

I did not try any troubleshooting

[10:34:06 PM] Mike Klodnicki: USB Cable

[10:34:09 PM] Mike Klodnicki: Tried all solutions but they didn't work

[10:34:10 PM] Bot:

Please try these final steps to resolve your issue:

Check if a software is causing the issue by closing all Razer apps and other keyboard configuration software.

If closing Razer Synapse fixed the issue, **reinstall your keyboard drivers**, and perform a **clean reinstall** of Razer Synapse.

Check if the issue persists with a different PC.

[10:34:10 PM] Bot: Did these steps resolve your issue?

Yes

Tried all solutions but they didn't work

I did not try any troubleshooting

[10:34:11 PM] Mike Klodnicki: Tried all solutions but they didn't work

[10:34:12 PM] Bot: **NOTE:** Please prepare a video or photo that clearly shows the issue of your device before contacting support. You can follow **this guide** on how to prepare and share your file.
